ABOUT ME

My academic background has helped me build skills in full-stack development and graphic design through hands-on projects. I enjoy creating responsive web applications, developing efficient back-end systems, and designing clean, user-friendly interfaces. I am familiar with tools and technologies such as Tanstack, Node.js, PostgreSQL, Figma, and Photoshop and I'm eager to apply and further improve my skills in real-world projects.

EXPERIENCE

2024 - 2025
LED THE DEVELOPMENT OF "THE EMPIRE" ORDERING APPLICATION
TEAM LEADER & MAIN PROGRAMMER
Led the development of our school project by handling both front-end and back-end programming of the application. Collaborated with my group members, managed project tasks, and helped in the planning and layouting of the system to ensure a functional, organized, and user-friendly ordering application.

2025 - 2026
DEVELOPED "MINDFUL COMPANION: A MENTAL HEALTH CHATBOT"
FULL-STACK DEVELOPER & UI/UX DESIGNER
Developed a web-based mental health support platform featuring an rule-based chatbot and self-help tools designed to promote user well-being and engagement. Responsible for both front-end and back-end development, as well as the planning, layout, and UI/UX design of the website to ensure a responsive, user-friendly, and visually organized experience.

2025 - 2026
DEVELOPED THE SJNDM SARI-SARI STORE APPLICATION
TEAM PROJECT MANAGER & MAIN PROGRAMMER
Led the development of a client-based system consisting of a mobile application for the cashier and a website for the client to improve store operations and management. As the Team Project Manager and Main Programmer, I handled both front-end and back-end development, coordinated project tasks, and worked closely with the team to ensure a functional, user-friendly, and well-structured system aligned with the client's needs.
